PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence and Data Science with a growing focus on artificial intelligence and machine learning. Actively developing skills in Python and data analytics, with a strong interest in building scalable, data-driven AI solutions. Passionate about continuous learning and applying intelligent technologies to solve real-world problems effectively.

TECHNICAL SKILLS

- **PROGRAMMING LANGUAGES:** Python, Java(Developing).
- **AI TOOLS & TECHNOLOGIES :** Large Language Models, RAG Models, GPT(OpenAI), Claude, Copilot (Microsoft).
- **LIBRARIES & FRAMEWORKS:** Pandas, NumPy, TensorFlow, Matplotlib, OpenCV, DeepFace, Scikit-learn, NLTK.

EDUCATION

BACHELOR OF TECHNOLOGY (Artificial Intelligence and Data Science) ***2022 – 2026***
RAMCO INSTITUTE OF TECHNOLOGY **CGPA 7.9**

PROJECTS

AI E-COMMERCE ANALYTICS SYSTEM

- Designed an AI-powered CSV querying system using LLM (Ollama – Mistral) to understand natural language queries.
- Implemented NLP techniques and Python-based filters to process user input and convert it into SQL queries.
- Connected SQL-based data fetching and intelligent analytics into a Flask-based web application.

DATE MODEL SYSTEM

- Developed a Python-based intelligent date normalization model to process multiple date formats automatically.
- Merged the model into a Flask web application for real-time date filtering and structured data retrieval.
- Executed a automated validation and error handling to support various user-input date patterns efficiently.

REAL-TIME ATTENDANCE TRACKING SYSTEM

- Implemented a Python & Django-based system using facial recognition for real-time staff entry and exit monitoring.
- Deployed a webcam-based face registration and automated attendance logging into XAMP Server.

INTERNSHIPS

EDIFY TECHNO SOLUTIONS – Chennai ***Sep 2023***

- Developed and optimized Machine learning models using Python on Google Colaboratory.
- Created AI-driven solutions through data preprocessing, model training, evaluation and enhanced Decision making.

TECHVOLT SOFTWARE PVT.LTD – Coimbatore ***Aug 2024***

- Managed a project on Human Action Recognition using 3D CNN, improving action classification accuracy by 85%.
- Designed and implemented the front-end interface using HTML, CSS, and JavaScript for users to interact with the recognition system.

ZOHO CORPORATION PRIVATE LIMITED – Tenkasi ***Dec 2025 - Feb 2026***

- Completed a 2-month internship focused on AI model and LLM-based application development, building projects such as AI E-commerce Analytics, Natural Language to SQL Conversion, AI Database Search, and an NLP-based Chatbot.
- Explored the Zoho ecosystem and developed extensions using Zoho Developer (Sigma) by integrating Zoho CRM, Books, and Desk, implementing API connections and automation workflows for seamless data synchronization.

ACHIEVEMENTS & PARTICIPATIONS

- **HACKATHON WINNER:** Secured 2nd Prize 30,000 at Hack Odyssey, a 24-hour hackathon organized by Kalasalingam University (March 2024), for building a tech solution using Frontend/Backend integration under time constraints.
- **PROJECT EXPO:** Participated in Intera-college event, AI Project Expo 2025 at our college and presented the project Human Action & Gesture Recognition with a user-friendly interface, secured 3rd place in the competition.

CERTIFICATIONS

- Python-Introduction to Data Science and Machine learning – Udemy
- Master course in Artificial Intelligence & Deep Learning – Udemy
- Introduction to Data Science – Cisco Networking Academy
- Deep Learning for Developers – Infosys Springboard
